                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 0                                                             | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 1                                                                                                                                                                                                                                                                                                                                                 | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 1                                                                                                                               | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 1                                                                                                                                                                                                             | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 0                                                                                                                                                                                                                                                                                                                                       | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 0   The symbol table shows the transmitted bits for an OFDM waveform. Each OFDM symbol is represented on a different row. Only data and pilot subcarriers are shown, pilot subcarriers are highlighted in red. Each subcarrier is demodulated with its respective constellation (BPSK for pilots, refer to the MCS for the data subcarriers).

## 4.14.3 Measurement Concepts

#### 4.14.3.1 Search Window

Measurements are performed by acquiring data equal in length to the user specified search length. This acquisition is referred to as the search window. Then, a valid packet is searched for within the search window. The WLAN standard selected determines what algorithms are used to detect a valid packet. The packet must be fully contained in the search window for successful demodulation. For this reason, the search length should be sufficiently larger than the expected packet length.

If no packet is detected, the AM vs Time (Search) window is updated with an appropriate error status. If a packet is detected, but demodulation fails, the measurement is considered a failure and the AM vs Time (Search) window is updated with an appropriate error message. At that point, a new search window will be acquired, and a new measurement attempted. Only one measurement is performed on a search window.

#### 4.14.3.2 802.11 A/N/AC/AX Demodulation

The demodulation process for 802.11a/n/ac/ax is as follows.

- A sliding average power window using the OFDM threshold is used to find the leading edge of a packet transmission.
- The L-STF is used to perform symbol timing.
- Frequency offset is measured and corrected using the L-STF and L-LTF.
- Equalization for the L-SIG is performed using both L-LTF symbols with an averaged zeroforcing algorithm. Equalization on the PSDU is performed with a zero-forcing algorithm on the LTF sequence preceding the data symbols.
- Symbols are demodulated using a user defined symbol offset (default -50%).
- Pilot tracking occurs over the PSDU. Both phase offset and timing are tracked, correcting for both residual frequency offset and sample rate offset through the PSDU. The pilot errors are measured after equalization on each data symbol.
- The PSDU is decoded if both the PSDU Decode setting is enabled and the PSDU is BCC encoded. If LDPC encoding is detected, PSDU decoding does not occur.

#### 4.14.3.3 802.11 AH Demodulation

Bandwidth is automatically detected for AH measurements. For any given bandwidth, the center frequency specified should be the frequency of the center-most null DC component of the signal.

When the 802.11ah standard is selected, the demodulation process is as follows,

- A sliding average power window using the OFDM threshold is used to find the leading edge of a packet transmission.
- Initial symbol timing is performed using the STF.
- A bandwidth detector is used to determine the bandwidth of the signal (1/2/4/8MHz).
- Fine symbol timing is performed on the LTF.
- Frequency offset is measured and applied using the STF and LTF.
- Equalization is estimated using the LTF and a zero-forcing algorithm.
- Symbols are demodulated using the specified symbol offset (default -50%)
- Pilot tracking occurs over the PSDU. This also determines the symbol rate error.
- The PSDU is decoded if BCC encoded.

#### 4.14.3.4 DSSS Demodulation

Signal detection occurs using a user supplied video trigger with a small amount of hysteresis followed by a preamble detect for synchronization. The waveform is then fully demodulated using standard BPSK/QPSK demodulation techniques.

### 4.14.4 WLAN Measurement Walkthrough

This section will guide you through making an OFDM WLAN measurement in Spike.

1) The first step is to determine if and where a WLAN signal is present. The easiest way to do this is by using the sweep measurement mode to find and center on a frequency of interest. In the picture below, the spectrum shows a WLAN signal at 1GHz is being generated by a signal generator.

5 Spike: Signal Hound Spectrum Analyzer Software

2) Once you have found a signal of interest, switch into WLAN measurement mode using the "Analysis Mode" drop down file menu. This will also carry over the current center frequency and reference level.

3) The first time the WLAN measurement tool is enabled, the layout will be preset for OFDM measurements, and the default standard set to 802.11a. You might see something like the picture below. In this case the AM vs Time (search) window is showing you the search waveform and a status message. In this case the status message indicates that a trigger was not found and we need to adjust our trigger settings.

4) The AM Vs Time (Search) plot is the most important plot for troubleshooting. Taken from the image above, this plot indicates that a video trigger was not found. We can see from the settings control panel the video trigger level is set to -30dBm and the highest amplitude measured in the search window is -40dBm. We need to lower the video trigger level.

5) We also need to setup our measurement using the WLAN settings control panel.

- a. Select the waveform type. In this example the input waveform is an 802.11n 20MHz waveform. Select this from the standard drop down menu entry.
- b. It may be necessary to adjust the center frequency of the measurement. This can be done with the carrier frequency setting.
- c. The input level control is the reference level and should be set to above the maximum power of the input waveform. Decreasing the input level control when possible will help increase the sensitivity of the analyzer and might improve your measurements.
- d. Set the trigger level and search length. The search length is the length of the capture the software will acquire and look for a valid waveform. The trigger level is the amplitude used to detect the start of a waveform within the search length. In this example, we will set the trigger level to -55 based on the waveform shown in the AM vs Time (Search) plot.

6) Once all relevant settings have been updated, you can see the other windows updating and no longer see a status message in the AM vs Time (Search) plot. Notice in the AM vs Time (Search) plot a blue bar under one of the signals. This indicates that this part of the search waveform was used to make the measurement.

- 7) Pressing "Single" will force the software to make one more valid measurement. Screen updates where a trigger was not found, or the measurement was invalid will not pause the software.
- 8) Add more measurement windows using the "Add Measurement" drop down menu.
- 9) Save your current configuration using Save/Load presets. This will save all measurement windows/locations and settings. Un-check "Auto Fit" if you plan on organizing the measurement windows in a custom fashion.

## 4.14.5 Troubleshooting

- If the search window reports "Invalid Packet Format", this means the first triggered measurement was not able to be demodulated using the current standard. This might mean the waveform was of a different standard or the signal was impaired beyond being able to successfully demodulate it.
- If the search window reports "Not Enough Samples" this means the waveform was detected but was at the end of the search window and would not be able to be successfully demodulated. If you see this often, try increasing the search window length.
- If the search window reports "Trigger Not Found", verify the waveform is present in the search window and that your trigger level is set to a proper value for the levels you see in the search window.
- Use the IF Bandwidth control to reject out of channel signals. WLAN waveforms coexist with other signals including WLAN and Bluetooth<sup>®</sup>. Out of channel energy might interfere with the measurement.
- The BB60C/D is only capable of measuring 20MHz BW OFDM waveforms.

## 4.15 LTE

*Note: The LTE measurements in Spike require that the correct MATLAB<sup>®</sup> runtime libraries are installed. This is a free software download and installation instruction are provided in the Appendix.* 

Note: LTE measurements are supported on 64-bit Windows and Linux operating systems only.

	The first foreign and the second seco		

LTE measurements can be made using the SM, SP, and BB line of spectrum analyzers. The LTE measurement mode in Spike provides basic downlink cell measurements including cell search and scanning capabilities.

The primary measurements available are listed below,

- Cell search and measurement at a specified center frequency.
- Cell scanning over a range of specified frequencies and LTE bands.
  - Detected cells are aggregated in a scan results window.
- Automatic MIB decoding and reporting of cell configuration values,
  - o Physical Cell ID
  - $\circ$  Bandwidth
  - o Duplex mode
  - Frame configuration
  - Power measurements
    - RSSI/RSRP/RSRQ
    - Frequency error

#### Analysis Modes | LTE

- EVM for PBCH and PSS
- PAPR calculation
- Automatic SIB1 decoding and reporting of various cell access related data,
  - All MCC/MCN pairs including Country/Provider lookup
  - EARFCN calculation
  - TAC/Cell Identity
- Standard spectrum analysis plots for the measured LTE frame
  - AM vs Time
  - Spectrum plot
  - Waterfall plot
  - Constellation for PBCH and PSS

### 4.15.1 Measurement Concepts

Spike supports two LTE acquisition modes,

- 1. Single frequency cell search and measurement. This is where the analyzer is tuned to a specific frequency. Cell search occurs at this frequency. If a cell is detected, full cell synchronization and demodulation occurs. Use this acquisition type when performing transmitter testing or characterizing a single cell. This is also the quickest way to determine if a valid cell exists at a specific frequency. This is the default measurement in the Spike LTE measurement mode.
- 2. Cell scanning. The software scans a range of user configured frequencies/bands looking for cells. At each frequency cell search occurs. If a cell is found full synchronization and demodulation occurs. The software adds the measurement to the cell search results table, updates the plots with the latest measurement, and advances to the next frequency. Specific LTE bands can be scanned, or custom frequency ranges can be entered.

#### 4.15.1.1 Cell Detection

Spike uses the PSS and SSS for the cell search. The cell must be within +/- 7.5kHz of the selected center frequency for a cell to be detected. If the PSS/SSS is detected, Spike uses this to determine the duplex mode, cyclic prefix length, and decode the MIB.

If any step between the start of the cell search process and decoding the MIB fails, the entire measurement is considered failed, and the software will report an error measurement status code. If the MIB is successfully decoded, the measurement is considered valid, and the software will attempt to decode the SIB1.

The SIB1 is transmitted on even numbered frames. If the frame detected in the cell search process above is odd numbered, the software will look at the next frame for the SIB1. Regardless of which frame is used for SIB1 decoding, the first valid frame in the captured I/Q data is used for the measurement plots. If the SIB1 is not able to be properly decoded, the measurement will continue as valid with the fields related to the SIB1 empty.

This entire measurement process occurs on roughly 40ms worth of captured I/Q data from the analyzer. The I/Q data is captured at the highest bandwidth possible to allow all possible cell bandwidths. In the single frequency measurement configuration, the reference level used is specified by the user in the *Ref Level* control. When performing a scan, the reference level is chosen automatically. At each frequency the software begins by configuring the analyzer in the most sensitive configuration. If the input causes an IF overload, the measurement is retaken with a higher reference level until an IF overload no longer occurs.

## 4.15.2 Control Panel

Following are descriptions of the controls found in the LTE settings control panel.

- **Center Freq-** Specifies the measurement center frequency when performing single frequency measurements. This value is not used when performing cell scans.
- **Freq Step** Specifies the frequency step when using the arrow buttons next to the center frequency controls
- **Ref Level** Specifies the measurement reference level when performing single frequency measurements.
- **Correlation Threshold** Specifies the cell search correlation threshold. Must be between 0.0 and 1.0.
- **Include in Results** When enabled, single frequency measurements are placed in the cell search results list.
- **Configure Scan** When pressed, brings up a dialog for selecting the bands for the cell scan. When finished, the *Scan Info* label should display a summary of your choices.
- **Scan Type** When set to single, a single scan through all configured bands occurs when *Start Scan* is pressed. When set to continuous, the software will continuously scan the configured bands until *Stop Scan* is pressed or the software leaves the LTE measurement mode.
- **Sort By** Determines how the cell search results are sorted by in the cell search results table. Choices are sorting by RSSI, frequency, or time.
- **Keep** When result grouping is enabled, and the software detects a duplicate cell, a decision must be made to determine which data to show for that grouped cell. This setting controls whether the last measurement made is shown in the results table, or the one with the highest power.
- **Group Results** When enabled, cell search results are grouped together in the cell search results table. Results are considered the same cell when the frequency and Physical Cell ID match.
- **Max Results** Determines the maximum number of cells that can be shown in the cell search results table.
- **Start Scan** Starts a scan of the user configured bands and shows the cells found in the cell search results table.
- **Stop Scan** Use this to stop a cell search mid-scan, or to stop a continuous scan.

## 4.15.3 Cell Search Results

Figure 61: Result of cell scan.

The cell search results window collects the scan results and if enabled, the single frequency measurement results in a simple ordered list. Results can be grouped together or can be individually placed in the list. When grouping is enabled, grouping occurs when both the frequency and cell ID match. Results can be sorted by frequency, amplitude, or time.

Each line in the cell search results shows a summary of a cell detected during a scan. The results can be cleared at any time or continue to be accumulated for subsequent scans. Results can be exported in a CSV format for post processing, or a custom format that can be imported into the software later.

## 4.16 MAPPING

Mapping mode binds measurements to geolocations. It includes functionality for georeferenced map import, GPS integration, automated measurements, heat mapping, measurement directionality with visual triangulation, Received Signal Strength Indicator (RSSI) expressed in the frequency of an audio tone, session import/export, and KML file export for integration with Google Earth and other compatible programs.

### 4.16.1 Measurements

Mapping mode can perform channel power measurements or several kinds of LTE measurements. These are selected between using the *Meas Type* selects in the *Meas Settings* and *LTE Settings* sections of the control panel.

#### 4.16.1.1 Channel Power

The channel power measurement type takes a channel power measurement over the center channel spanning the *Meas Bandwidth*, using the configuration specified in the *Sweep Settings* section of the control panel.

It results in readings for power, peak, and occupied bandwidth.

#### 4.16.1.2 LTE

*Note: The LTE measurements in Spike require that the correct MATLAB<sup>®</sup> runtime libraries are installed. This is a free software download and installation instruction are provided in the Appendix.* 

Note: LTE measurements are supported on 64-bit Windows and Linux operating systems only.

The LTE measurement type performs a single frequency cell search and measurement. The result can be specified as either RSSI or RSRP by *Meas Type*. See <u>LTE Analysis Mode</u> for detailed information about this measurement.

The result of an LTE measurement can be smoothed by applying averaging over the number of measurements specified by *Avg Count*.

## 4.16.2 Measurement Settings Control Panel

The following is a description of the various controls in the Measurement Settings control panel.

#### 4.16.2.1 Meas Settings

- **Center Freq –** The center frequency of the sweep.
- **Ref Level** The power level of the top graticule line. This should be no lower than the maximum expected input level of the signal.
- **Meas Type –** The type of measurement to be taken.

#### 4.16.2.2 Sweep Settings

- **Span** Frequency span around the center frequency.
- **Meas Bandwidth** The bandwidth of the channel bandwidth measurement.

- **RBW** Resolution bandwidth, using a flattop window.
- **VBW –** Video bandwidth.
- **Auto RBW** Having auto selected will choose reasonable and fast RBWs relative to the span. When changing span, it is recommended to have this enabled along with Auto VBW.
- **Auto VBW –** When enabled, VBW will equal RBW.
- Video Units See <u>Sweep Settings control panel</u>. This should be set to Power.
- **Detector** See <u>Sweep Settings control panel</u>. This should be set to Average.
- Sweep Time See <u>Sweep Settings control panel</u>.

#### 4.16.2.3 LTE Settings

- **Meas Type –** The type of LTE measurement to be taken.
- **Avg Count** The number of measurements to average. This can range from one (no averaging) to 25.
- **Curr Avg** The running count of measurements being averaged into current reading. This will not exceed the *Avg Count*.

### 4.16.2.4 Point Settings

- **Declination** The adjustment for declination, specified in positive or negative degrees, applied to angles manually entered into the Azimuth field in the detail view of a point in map view. Declination can be found using a website such as <u>NOAA</u>.
- **Occupied Bandwidth** The percentage power in occupied bandwidth calculation.
- **GPS Meas Speed** The minimum time passed since last measurement for new measurement to be taken.
- **GPS Meas Min Delta** The minimum distance from location of last measurement for new measurement to be taken.
- **Max Points** The maximum number of measurements that can be acquired. This will not retroactively affect measurements taken.

#### 4.16.2.5 Audio Settings

- **Audio Enabled** Enables Received Signal Strength Indicator (RSSI) audio tone. This will use the system audio configuration. The frequency of the tone increases with the channel power of the signal being measured.
- **Volume –** The volume of the audio tone.

#### 4.16.2.6 Plot Settings

- **Map** Shows or hides the map view.
- **Spectrum –** Shows or hides the spectrum plot of the current measurement.
- **Measurements Table –** Shows or hides the table of measurements.

## 4.16.3 Map Settings Control Panel

The following is a description of the various controls in the Map Settings control panel.

#### Analysis Modes | Mapping

- **Map Scale** The zoom percentage of the map.
- **Point Border –** Toggles a black border around points.
- **Point Size –** Controls the size of points on the map.
- **Point Opacity –** The color opacity of points.
- **Azimuth Lines** Toggles lines drawn on the map from directional points at their azimuth angles.
- Min Color (dBm) The power that represents the coldest color on the heat map.
- **Max Color (dBm)** The power that represents the hottest color on the heat map. This cannot be higher than the ref level.
- **Auto Color** Measurement points are automatically heat mapped based on the power range across them.

### 4.16.4 Map View

Figure 62: Map view with heat mapped measurements taken of a cell tower signal.

The map view contains an interactive, georeferenced map with overlayed measurements, along with controls and informational readouts.

A map is loaded by choosing *Load Map* from the local *File* menu, and then choosing an image from your hard drive. The map is georeferenced by choosing *Set Coordinates* from the *File* menu, and entering the bounding coordinates, that is the latitude coordinates corresponding to the top and bottom edges of the map image, and the longitude coordinates corresponding to the left and right. Map is removed with *File* > *Unload Map*. Note that this will clear all measurements and georeferencing coordinates.

See the OSM Map Import Guide for instructions on downloading a georeferenced map from OpenStreetMap and importing it into Spike.

If GPS data is present, either because the device has an internal GPS, or there is an external GPS connected to the PC, the user's current location will be represented by a red target icon on the map.

See the <u>GPS section</u> for details on how to configure GPS with the GPS controls at *Utilities* > *GPS Control Panel*.

On the map, a point represents a measurement tied to a geolocation and a time. There are three modes for interacting with measurements on the map, represented by icon buttons in the upper toolbar:

**1) Select mode** – Indicated by the arrow icon, the mouse can be used to select and deselect points. When a point is selected, its information is displayed in the detail panel on the right.

If a point is directional, then its azimuth angle can be changed by selecting it and dragging the point around its axis.

- **2) Click mode** Indicated by the pencil icon, the mouse can be clicked to capture a measurement at the location of the mouse cursor. The point is immediately drawn on the map.
- **3) GPS Tracking mode** Indicated by the GPS paddle icon, this mode is available when there is an external or internal GPS connected. Measurements are automatically taken at the time and minimum distance intervals specified in the *GPS Meas Speed* and *GPS Meas Min Delta* fields in the *Point Settings* section of the *Meas Settings* control panel.

In the upper toolbar, the map mode is displayed, as well as the number of measurement points captured over the maximum points set by the user.

#### 4.16.4.1 Color Bar

From red to blue, the color bar shows the hot-cold spectrum to which points are mapped based on their measurement results, and what dBm values are represented by the top and bottom. These values can be configured precisely using the *Min Color* and *Max Color* sliders in the *Map Settings* control panel. If set to *Auto Color*, then the top and bottom of the spectrum will be determined by the minimum and maximum powers of the current set of measurement points.

#### 4.16.4.2 Measurement Detail Panel

The measurement detail panel appears whenever a point is selected, and shows all the details of that measurement. They are:

- **Frequency** The center frequency at the time of measurement.
- **Bandwidth** The meas bandwidth at the time of measurement.
- **Power/RSSI/RSRP** The measured channel power, RSSI, or RSRP of the signal.
- **Peak –** The measured peak power of the signal.
- **Occupied/Cell Bandwidth** The measured occupied or cell bandwidth of the signal.
- **Time –** Timestamp for when the measurement occurred.
- **Latitude –** The latitude dimension of the point's geocoordinates.
- **Longitude** The longitude dimension of the point's map coordinates.
- **Pixels from Left –** The horizontal position of the point on the currently loaded map.
- **Pixels from Top –** The horizontal position of the point on the currently loaded map.
- **Directional** Whether or not the point has a directional component.

• **Azimuth** – The direction or bearing of the point, specified as an angle in degrees clockwise from North, from 0 to 360. If a declination is set in the *Declination* field of the *Meas Settings* control panel, then it will be automatically applied to any new value typed into this field. It will be added once to the angle entered.

#### 4.16.4.3 Sessions

A session includes a georeferenced map image, set of measurement points, and measurement and map configuration set in the respective control panels. (The latter is what is saved in a preset.)

Sessions can be imported and exported using *Import Session* and *Export Session* in the *File* menu. A session will be saved as three files: one with the .spikemap extension, a JSON format storing the measurements and map configuration, a .png file holding the map image, and an .ini file storing the measurement configuration as in a preset. If the session is manually moved on the hard disk, all three of these files must be moved together to the same directory.

## 4.16.5 Spectrum Plot

Figure 63: Channel power spectrum plot showing an FM signal.

120

The channel power spectrum plot shows the current sweep, with the channel power measurement window shaded, and diamonds indicating the lower and upper bounds of the occupied bandwidth.

The channel power reading is displayed top center, the occupied bandwidth reading bottom left.

#### 4.16.5.2 LTE

Figure 64: LTE spectrum plot showing a cell signal.

The LTE spectrum plot shows the LTE measurement with the cell bandwidth shaded if there is a valid cell signal detected.

## 4.16.6 Measurements Table

Me	asurements										
File	•										
	Freq	Bandwidth	Power (dBm)	Peak (dBm)	Occupied Bandwidth	Time	Latitude	Longitude	Position (px)	Directional	Azimuth 📤

Figure 65: Table showing all measurements acquired in current Mapping mode session.

The measurements table displays a full list of all measurements captured in the current session.

There are several options for export in its *File* menu:

- **CSV** Points are saved in CSV format to a file on hard disk.
- **KML** Points are saved in KML format, an XML-based geodata format compatible with Google Earth, Google Maps, and other programs that support the extension. Measurement details are compiled in an HTML table within the description field. Heat mapping will be visible in Google Earth.

### 4.16.6.1 Opening a KML file in Google Earth

#### Figure 66: Opening a KML file in Google Earth.

To open a KML file of measurement points saved with *File > Save KML*, open Google Earth in a web browser. Click the *Projects* icon, then click the *New project* button, and then choose *Import KML file from computer*.

## 4.16.7 Audio Received Signal Strength Indicator (RSSI)

An audio tone can be played which tracks with the channel power of the measured signal. The tone's frequency rises with the signal power. Toggle on and off and set the volume in the *Audio Settings* section of the *Meas Settings* menu.

# 4.17 VCO CHARACTERIZATION

VCO Characterization mode evaluates the performance characteristics of voltage controlled oscillators (VCOs). It includes standard measurements for frequency vs. voltage, sensitivity (frequency change per volt), power vs. voltage, current vs. voltage, and harmonic power vs. voltage for the first six harmonics.

VCO characterization measurements require a PN400 phase noise tester, and are available for SM, BB, and SP145 series devices.

## 4.17.1 VCO Settings Control Panel

#### Figure 67: VCO Settings control panel.

The following is a description of the various controls in the VCO Settings control panel.

#### 4.17.1.1 PN400 Settings

• **Status –** Indicates whether a PN400 device is currently connected.

• **Connect** – Button to connect a PN400 device.

#### 4.17.1.2 DC Source Settings

- **Enable Output** The overall state of the PN400 outputs. When disabled, no DC power will emit from the PN400.
- **Fixed V Supply –** The level of V Supply, the fixed source PN400 output.

#### 4.17.1.3 Sweep V Tune Settings

- **Start –** The starting or lowest control voltage to be measured.
- **Stop** The stopping or highest control voltage to be measured.
- **Meas Points –** The total number of voltage points to measure.
- **Dwell Time** The delay between setting the PN400 output voltages and measuring the VCO's response.

#### 4.17.1.4 Meas Settings

- **Ref Level** The power level of the top graticule line. This should be no lower than the maximum expected input level of the signal, that is the output level of the VCO.
- **Auto Freq Band –** Automatically determine the frequency range for measurements.
- **Freq Start –** The start frequency for each measurement.
- **Freq Stop –** The stop frequency for each measurement.
- **Freq Resolution –** The RBW of the analyzer sweep at each measurement point.
- **Channel Power Width** The width of the channel for power and harmonics measurements.

#### 4.17.1.5 DC Limits Settings

- **V Tune Min** The minimum output voltage level of the V Tune port on the PN400.
- **V Tune Max** The maximum output voltage level of the V Tune port on the PN400.
- V Supply Min The minimum output voltage level of the V Supply port on the PN400.
- **V Supply Max** The maximum output voltage level of the V Supply port on the PN400.

## 4.17.2 Measurement Windows

#### 4.17.2.1 Frequency

The frequency vs. voltage plot shows the frequency of the VCO's peak output for a given control voltage.

### 4.17.2.2 Sensitivity

The sensitivity plot shows the slope of the VCO performance, as the frequency change between measurement points in Hz/V.

### 4.17.2.3 Power

The power vs. voltage plot shows the power of the VCO's output for a given control voltage.

### 4.17.2.4 Current

The current vs. voltage plot shows the current of the VCO's supply output for a given control voltage.

#### 4.17.2.5 Harmonics

The harmonics vs. voltage plot shows the harmonic power of the VCO's output for a given control voltage, at each of the first six harmonics.

### 4.17.3 VCO Characterization Measurement Walkthrough

When VCO Characterization mode is entered, Spike will automatically look for a local PN400 and try to connect to it. If successful, the Status in the PN400 section of the VCO Settings control panel will show the serial number of the PN400 in green. Otherwise, a dialog will be shown alerting the user that a PN400 must be connected. At this point, one can be connected to the PC, and the Connect button pressed.

The mode remains in an idle state until Single is pressed to begin taking a measurement. This should be done after configuration is complete.

Initially, DC power on the PN400 is disabled. To avoid VCO damage, it should only be enabled after setting appropriate V Tune and V Supply limits in the DC Limits section of the VCO Settings control panel. Once this is done, it is safe to enable output in the DC Source section of the panel.

The rest of the configuration is accomplished in the Sweep V Tune and Meas sections of the control panel, and by setting the fixed output level of the PN400 in the DC Source section.

At each point in the measurement, beginning with the Start voltage and ending with the Stop voltage, the PN400 V Tune port is set to output the given voltage, execution is delayed by the dwell time, and the analyzer is swept across the automatically or manually defined frequency band using the configured frequency resolution (RBW) and reference level. The peak value of this sweep is the basis for the frequency measurement. The sensitivity measurement considers the frequency measurement from the current and the previous sweep. The power and harmonics measurements derive from channel power

measurements taken around the peak and each of the first six computed harmonics using the configured channel power width. Current is reported by the PN400.

A measurement may be aborted at any time using the Abort button in the tool bar. A configuration change during a measurement will trigger the measurement to restart with the new configuration.

# 5 Taking Measurements

This section helps a user learn how to measure, analyze, and record signals using the Spike software, utilizing built-in features such as markers, record/playback, and channel power.

## 5.1 MEASURING FREQUENCY AND AMPLITUDE

## 5.1.1 Using Markers

The software has several tools for identifying a signal's frequency and amplitude. The easiest to use is the **marker**. There are 6 markers available, each with its own reference.

To activate and place a marker left click inside the graticule or press the **Peak Search** button on the marker controls to place the marker on the current trace peak and activate it simultaneously. Once a marker is active the frequency and amplitude readout of the marker is displayed in the upper right corner of the graticule. The marker's accuracy is dependent on the span and RBW. Narrower spans and RBWs have higher marker accuracy. The amplitude accuracy is NOT dependent on the vertical dB/div, since the I/Q data is linear in voltage and has much higher resolution than is displayed. The marker may be re-placed at any time by clicking the graticule or by using the left and right arrows to shift the marker one sample point to the left or right.

## 5.1.2 Using the Delta Marker

To measure differences or changes in frequency and/or amplitude use the **Delta** markers. To use the delta markers, you must first create a reference point. With a marker active, click the Delta button on the marker/trace control panel. This places a reference location on the graticule. Now the marker readings will report the difference between the marker and the reference. To disable the delta marker, press the Delta button again.

## 5.1.3 Measuring Low Level Signals

To measure low-level signals, there are a few tricks to getting accurate readings. First, set the reference level to -50 dBm or lower. This internally selects the highest sensitivity settings. Using an external time base and narrow span (1 KHz or less) should give the best results. Video averaging may be required for a stable amplitude reading.

## 5.2 SWEEP RECORD AND PLAYBACK

Spike provides the ability to store and playback a sequence of sweeps from any Signal Hound spectrum analyzer. Several controls exist which make it easy to perform short term acquisition and analysis or long recording projects such as spectrum monitoring. Sweep recording files store a series of sweeps along with configuration information to a file with the extension (.shr).

[Version 3.1.13 introduced the SHR file format but will continue to playback the BBR file format from earlier versions of the software. As of version 3.1.13 the software no longer generates BBR file.]

## 5.2.1 Sweep Recording

Sweep Recording									
Decimation Type	Sweep Count	-	Channelizer Enabled	$\checkmark$	Progress	Saved	Max File Size	3 GB	
Decimation Time	1	.000 s	Channel Center	100.000000 MHz	Sweep Count	15	Max Files	1	
Decimation Count		1	Channel Spacing	20.000000 MHz	File Size	26.727 MB	File Prefix	SWEEP_REC_	
Decimation Detector	Averaging	*	Output Units	dBm (Channel Power)	File Count	1		Change Directory	
	Start Recordin	ng			Disk Free	59.04 GB			

Figure 68: Active sweep recording.

The sweep recording control panel is enabled in sweep and real-time analysis modes. Most controls on the recording panel are used to control the amount of data stored. Many Signal Hound spectrum analyzers sweep at rates that produce very large recording files if not properly managed. The available controls provide two ways to reduce the amount of data stored.

- 1) Decimation in time Decimation in time refers to the action of averaging or max-holding several sweeps over time. You can control either the amount of time or the number of sweeps you wish to decimate for. For example, selecting a 1 second decimation time and max hold decimation detector, the software will perform a max hold detector on sweeps over a 1 second duration, at which point the max held sweep will be stored to the file. This creates a file with a sweep being stored every 1 second. By specifying a sweep count, a similar effect is achieved, except instead of waiting for a specified duration, the detector operation will occur on 'count' number of sweeps.
- 2) Decimation in frequency Decimation in frequency refers to channelization of the sweep using a channel power measurement. The channel width and center frequency of the channels can be selected. The output of the channel power measurement can be stored in dBm or dBm/Hz units. For example, a channel center frequency of 2440MHz and channel spacing of 1MHz will perform the channel power measurement on 1MHz channels evenly spaced 1MHz apart from the frequency of 2440MHz. The channel center frequency specified can be the center frequency of any channel.

Both decimation types can be enabled simultaneously, at which point the channelization will occur before the decimation in time. If no decimation is required (i.e. store every sweep from the device), disable the channelizer and select the decimation type 'count' with a decimation count of 1.

In addition, the amount of data stored can be limited using the maximum file size and maximum file count settings.

Press the *Start Recording* button to begin recording. The first file is created immediately in the configured directory. When the max file size is reached, recording will continue in another sequentially numbered file, until the maximum file count is reached. Pressing the *Stop Recording* button ends the recording session.

### 5.2.2 Sweep Playback

Sweep Playback	
	aying
Sweep: 59 / 225	
Date/Time: 05/03/2018 15:24:01:344	
Lat: 45.879321 Lon: -122.583659 Alt: 207.431m	
Playback Speed	64.000 ms
Sweep Playback Sweep Recording Peak	Table

Figure 69: Playback of recorded SHR sweep file.

To begin a playback of an SHR sweep recording file, press the play icon button on the *Sweep Playback* control panel. After selecting a valid file, sweep playback should begin immediately. Use the slider bar as well as the pause, step, and rewind buttons to control the playback. The playback speed determines the amount of time to wait before showing the next sweep in the recording. For example, a playback speed of 1 second plays sweeps from the recording at a rate of 1 per second.

When replaying a saved session, all measurement functionality of the software remains, such as markers, min/max/avg traces, channel power, occupied bandwidth, persistence, and spectrogram views.

When finished, press the stop icon button and software control will return to the connected analyzer.

Tip: The title is also saved and shown during playback. Use a title to describe the session!

## 5.3 I/Q RECORDER

Figure 70: I/Q Recorder Utility.

The I/Q Recorder utility is used to perform dedicated short to long-term I/Q captures to disk. The I/Q recorder utility can be accessed through the Utilities drop down menu.

It provides simple configuration for the device, file system, and data format, a minimal spectrum preview window with adjustable RBW, and an informational readout of critical information during capture.

## 5.3.1 Configuration

The following are descriptions of the various settings and displays on the control panel, used to configure the capture and preview window, and monitor relevant information.

#### 5.3.1.1 Capture

- **Center Freq** Specifies the tuned center frequency of the capture, ie. the 0Hz frequency of • the I/Q data.
- **Ref Level** Specifies the expected input power of the signal. This controls the reference • level and the gain and attenuation.

- **Sample Rate** Selects the sample rate of the current visible I/Q data capture. This number is equal to the device sample rate divided by the decimation value.
- **Bandwidth** Controls the bandwidth of the passband filter applied to the I/Q data stream. The bandwidth cannot exceed the Nyquist frequency of the I/Q data stream.
- **Auto Bandwidth** When set to Auto, the Bandwidth passes the entire bandwidth of the I/Q data capture.

#### 5.3.1.2 Preview

• **RBW** – The desired RBW for the spectrum preview plot. Lower RBWs increase the required FFT window length. If the FFT window length is not long enough to achieve the desired RBW, the spectrum window will show a warning and the user will need to increase RBW to display the spectrum plot.

#### 5.3.1.3 File

- **Save Directory** Selects the directory for the I/Q waveform files to be stored.
- **File Prefix** Applies a file name prefix to all files saved. Useful for creating identifiable file names. By default, the file name includes a second-resolution timestamp and sequence number.
- **Max File Size** Specifies the maximum amount of data to store in a single file.
- **Max Files** Specifies the maximum number of files to write.
- **Max Disk Usage** Specifies the maximum percentage of the hard disk that can be used. The hard disk is determined by the Save Directory.
- **Data File Format** Selects the file format to be used when saving I/Q data. By default, this is set to binary 16-bit complex integers.

#### 5.3.1.4 Informational

- **Data Saved** Displays the total amount of data written during the current capture.
- **Files Saved** Displays the number of files written during the current capture.
- **Disk Free** Shows the percentage of the hard disk that is free. The hard disk is determined by the Save Directory.
- **Rate** Shows the current rate of data being captured and written to disk.

## 5.3.2 Recording

Acquisitions begin by pressing the *Record* button located in the control panel.

The capture begins immediately, and data is saved in sequentially labeled files in the *Save Directory*. Each file is prefixed with *File Prefix*, followed by a second-resolution timestamp tied to the start of the capture (not the start of the file). Each file has a maximum size specified by *Max File Size*.

Recording proceeds until one of the following events occurs or conditions is met:

- 1) The user presses the *Stop* button.
- 2) *Max Files* have been written to disk.
- 3) Disk usage will exceed *Max Disk Usage*.

Several statistics in the *Informational* section of the control panel show you the status of the acquisition and the current capacity remaining on the selected disk drive.

## 5.3.3 I/Q File Formats

Each I/Q capture is saved as a sequence of files holding the waveform data in the format specified by the "Data File Format" dropdown in the "File" section of the control panel.

The available formats are listed and described below.

#### 5.3.3.1 16-Bit Binary

Files saved in the 16-bit binary format contain I/Q values as signed 16-bit complex integers. They have little-endian byte ordering. Samples are stored in sequential order as

 $I_1, Q_1, I_2, Q_2 \dots I_n, Q_n$ 

The values are stored as full scale, ranging from -32768 to +32767, representing floating point values between -1.0 and 1.0. To convert these samples to floating point,

- 1) Read the samples from the file into signed 16-bit complex integer values.
- 2) Convert to full-scale floating-point values with the following equations,

o float re32f = (float)re16s / 32768.0; o float im32f = (float)im16s / 32768.0;

The data should now be floating point values between [-1.0, 1.0)

3) Optionally, if you want to recover the amplitude accurate I/Q samples referenced to dBm, use the following equations,

```
o CorrectionFactor = sqrt(10^(refLevel in dBm / 10.0));
o Re32f *= CorrectionFactor;
o Im32f *= CorrectionFactor;
```

Once scaled, the I/Q data can then be converted to a dBm value rather than a dBFS value using the equation,

o Sample power (dBm) = 10.0 \* log10(re32f \* re32f + im32f \* im32f);

### 5.3.4 Preview Window

The preview window shows a spectrum plot of the waveform being recorded. It applies a single FFT using the specified *RBW* across a portion of the capture, and updates at a rate of roughly 10 FPS.

The preview window plot adheres to the <u>basic plot</u> interface in Spike.

## 5.3.5 Precautions

Precautions must be taken when performing I/Q captures to ensure your existing data does not become corrupted and your I/Q waveforms are captured without error. Below is a list of recommendations and precautions when using the I/Q record capabilities of the Spike software.

 Store waveforms to an external hard drive and not the operating system (OS) hard drive. If your OS hard drive approaches 100% capacity, you will run into issues which will prevent your OS from operating properly. If you absolutely must store I/Q waveforms on the same drive as your OS, keep 20% of the disk free (Windows suggests 15%).

You can set an upper limit on this using the *Max Disk Usage* field in the *File* section of the control panel. The default value is 80%.

2) Calculate the expected capture size beforehand using this simple formula:

Size of Capture (Bytes) = Max Files \* Max File Size (kB) \* 1000 
$$\left(\frac{B}{kB}\right)$$

3) Ensure your hard drive write speed exceeds the acquisition speed of the analyzer. For many sample rates standard hard drive write speeds will be insufficient to sustain long term captures. This will create gaps in the data which will affect the quality of your measurements. The record speed will depend on the data file format. For 16-bit binary data, a simple calculation of the record speed is

Write Speed (Bytes per second) = Sample Rate \* 4

It is expected the hard drive write speed exceeds this value by a reasonable margin. For some of the highest sample rates, a performance hard drive configuration will be necessary. For example, at its highest sample rate, the SM200C can output 800 MB/s of data.

When evaluating high performance drives to handle this throughput, make sure to note the spec for sustained write speed and not just burst speed. Otherwise, it will fall behind after writing a fixed amount of data.

4) Ideally, an operator should be present at the software and monitoring the acquisition status. Consider performing test runs on known signals to ensure your acquisitions settings are correct before committing to a long acquisition process.

## **5.4 CAPTURING SIGNALS OF INTEREST**

CSV files can be created of traces with the *Trace Export* button found on the control panel. CSV files are useful for performing further signal analysis or plotting outside the Signal Hound application. When exporting a trace into a CSV file, the currently shown trace is exported. Because of this it may be difficult to obtain a CSV file of a signal of interest. For example, an intermittent signal which appears sporadically may be difficult to capture, or some modes such as Real-Time signal analysis are prohibited from saving CSV files.

One way to export a desired signal is to record the spectrum using the playback toolbar. After capturing a signal via recording, the session can be played back and paused on the signal of interest. From there, the signal can be exported or measured through standard means.

Min and Max hold traces are another way to capture intermittent hard to view signals. Min and max hold keep track of the minimum and maximum values over a period storing them in a separate viewable trace.

## 5.5 CHANNEL POWER

Channel Po	wer										
Enabled	$\checkmark$		State		Offset	Bandwidth	Lower (dBc)	Lower (dBm)	Upper (dBc)	Upper (dBm)	•
Target	Trace One 👻	1	Enabled	*	200.000000 kHz	180.000000 kHz	-20.75	-55.22	-20.66	-55.12	
Width	180.000000 kHz	2	Disabled	*	20.000000 MHz	20.000000 MHz	N/A	N/A	N/A	N/A	
Power	-34.47 dBm	3	Disabled	*	20.000000 MHz	20.000000 MHz	N/A	N/A	N/A	N/A	
	Start Logging	4	Disabled	Ŧ	20.000000 MHz	20.000000 MHz	N/A	N/A	N/A	N/A	
	Change Directory	5	Disabled	*	20.000000 MHz	20.000000 MHz	N/A	N/A	N/A	N/A	-

Figure 71: Channel Power control panel measuring a broadcast FM signal.

The Channel Power control panel configures, measures, and logs a main channel and 5 adjacent channels, each consisting of a lower and upper component.

The main channel controls are on the left. Channel power can be enabled from here. This applies to all channel power measurements, so the main channel must be enabled to take measurements on the adjacent channels. Target specifies which trace will be used for measurements. Channel width specifies in Hz the width of the band to measure. Power displays the channel power of the main channel. Start Logging creates a new CSV file and logs the main channel and all enabled adjacent channels for each sweep. Logging continues until Stop Logging is pressed. Change Directory sets the directory in which to save log files.

The adjacent channels are listed as rows in the table on the right. The first three fields are for configuration, the rest for measurements. The state field is used to enable or disable the channel. Offset refers to the center-to-center frequency difference between the center channel and the adjacent channel. Between channels, there is typically (but not always) a small guard band whose power is ignored. Bandwidth specifies the width in Hz of the adjacent channel.

The adjacent channels, which have a lower and upper component, show the channel power as well as the difference in power between the center channel and themselves. In the example below the difference might be used to determine if any power is "leaking" into an adjacent FM band.

For example, the image below shows a channel bandwidth of 180 kHz with one adjacent channel with an offset of 200 kHz. The image shows the FM station 101.1 in the center channel. Each channel will be integrated and the resulting power is displayed in the table.

#### Taking Measurements | Intermodulation Distortion

Figure 72: Channel Power on a Broadcast FM Signal

For best results, set the video processing to AVERAGE, POWER, and turn spur reject off. The software will throw a warning if the settings are not configured properly when activating channel power.

## 5.6 INTERMODULATION DISTORTION

Frequency	Amplitude (dBm)	Amplitude (dBc)	TOI (dBm)
10.065773 GHz	-109.785	-2.297	-106.340
10.073780 GHz	-107.488	N/A	N/A
10.081788 GHz	-106.722	N/A	N/A
10.089796 GHz	-108.232	-1.511	-105.966
	Frequency 10.065773 GHz 10.073780 GHz 10.081788 GHz 10.089796 GHz	Frequency         Amplitude (dBm)           10.065773 GHz         -109.785           10.073780 GHz         -107.488           10.081788 GHz         -106.722           10.089796 GHz         -108.232	Frequency         Amplitude (dBm)         Amplitude (dBc)           10.065773 GHz         -109.785         -2.297           10.073780 GHz         -107.488         N/A           10.0581786 GHz         -106.722         N/A           10.089796 GHz         -108.232         -1.511

#### Figure 73: Intermodulation Distortion control panel.

The Intermodulation Distortion control panel measures intermodulation products and computes thirdorder intercept.

It is expected that two signals are injected, one with lower frequency  $F_1$ , and the other with higher frequency  $F_2$ . The two highest peaks are found, and considered to be  $F_1$  and  $F_2$ . From these points the third-order products  $2F_1 - F_2$  and  $2F_1 - F_2$  are derived. These four points are displayed on the graticule as trace markers.

Aside from frequency and amplitude, the table shows two additional calculations for the third-order products. Amplitude (dBc) is the differential amplitude between the third-order products and the base tones, and TOI is the third-order intercept point. They are calculated as follows (only the lower calculations are shown):

$$\Delta P_{Lower} = P_{IM3_{Lower}} - \frac{2 * P_{Lower} + P_{Upper}}{3}$$

$$TOI_{Lower} = \frac{P_{Upper}}{2} + P_{Lower} - \frac{P_{IM3\_Lower}}{2}$$

## 5.7 TRACE MATH

Figure 74: Power difference function measuring signal power below the instrument noise floor.

Trace math performs simple math operations between 1 or 2 traces and stores the results in a user specified result trace. The source and result traces are selectable from the 6 user customizable traces. The math operations available are listed below. All operations are defined using a logarithmic plot scale. If linear mV scale is used, the result is converted to mV. All operations are performed on a bin-by-bin basis.

- **Power difference**: A power difference is calculated between two traces and stored in the result trace.
  - Result = Log(Power(Op1) Power(Op2))
  - **Power sum**: A power sum is calculated between two traces and stored in the result trace.
    - Result = Log(Power(Op1) Power(Op2))

- Log Offset: A dB offset is applied to a single trace and is stored in the result trace.
   Result = Log(Op1) + offset (dB)
- Log Diff: A log difference is calculated between two traces and stored in the result trace. An additional dBm offset is applied to the difference.
  - Result = Log(Op1) Log(Op2) + offset (dBm)

When trace math is enabled, the trace math operation occurs at the time the result trace is normally processed. User traces are processed in order (1,2,3,4,5,6) after a sweep is retrieved from the spectrum analyzer. For example, the trace math operation  $\{3 = 1 - 2\}$  occurs when trace 3 is to be processed. In this example, trace 1 and 2 are already processed before the trace math operation occurs. An operation such as  $\{2 = 1 - 3\}$  means that trace 2 will be the result of trace one (updated just before trace math occurs) minus trace 3 (last updated on the previous sweep).

A sweep must be retrieved from the analyzer before a math result can be displayed. Ensure all traces in the math equation are enabled (type not set to Off) to see the trace math result. Trace type operations can be combined in conjunction with trace math. For instance, trace math can be enabled with a result trace of 3, and trace 3 can also have trace averaging enabled. Markers can be placed on math result traces as normal. Use offsets for log operations to offset the result into the plot window.

If the power diff operation is selected, any negative or zero valued bins calculated as the result of the difference are replaced by the smallest non-zero value in the trace after the difference operation is performed.

# 5.8 USING THE REFERENCE LEVEL OFFSET

When measuring a signal that has been attenuated or amplified it is useful to let the software adjust the measured signal by this offset. In Spike, you can enter this gain/attenuation value so you can directly view the corrected measurement.

The proper way to set the reference level offset in Spike is the set the reference level offset and then set the reference level to the value you want to see after the offset is applied. For example, if you are viewing a 30dBm signal that is being attenuated by 40dB, first set the reference level offset to 40dB, then then set the reference level to 30dBm.

## 5.9 NOISE MARKERS

Noise measurements are made using the noise markers in the Spike software. To enable this measurement, change the active marker type to 'Noise' and place the marker on the spectrum.

Noise marker measurements are only available in sweep and real-time modes, and with the average video detector enabled. For the most accurate measurements, average detector and power video units should be selected.

The noise measurement reading is normalized to 1Hz and accounts for the under response due to either log or voltage scale VBW averaging. The measurement is averaged over ½ a division. The formula used for calculating the noise reading is below.

$$P_{dBm/Hz} = 10 * log10 \sum_{f1}^{f2} \left(\frac{P_{mW}}{Span_{Hs} * NBW}\right) + C_{dB}$$

Where NBW equals the RBW filter (window function) noise bandwidth. f1 and f2 are frequencies spanning  $\frac{1}{2}$  a display division and are centered on the marker frequency. C is a constant, where C = 0.0 when power video units are selected, C = 2.51 for log video units, and C = 1.05 for voltage video units.

## 5.10 CHANNEL POWER MARKERS

Channel power measurements can be made quickly using the channel power markers in the Spike software. To enable this measurement, change the active marker type to 'Channel Power' and place the marker on the spectrum.

Channel power marker measurements are only available in sweep and real-time modes.

The bandwidth of the channel to be measured is specified using the Ch Power Width field.

# 5.11 N DB MARKERS

An N dB marker can be used to measure the bandwidth of a signal in the Spike software. To enable this measurement, change the active marker type to 'N dB' and place the marker on the spectrum, on a peak.

N dB measurements are only available in sweep, real-time, and scalar network analysis modes.

Typically used to measure the bandwidth of a filter, the marker is placed on a peak, and the left and right arrow markers are shown about N dB down the transition band on either side of the peak. The result of this measurement is the frequency difference between these two arrow markers.

The value of N, called the offset, is specified using the N dB Offset field.

The N dB measurement works by looking for the closest point on either side of the primary marker that is at least N dB down from the primary marker, and then choosing the point with distance closest to this offset value.

If no point is found on either side that is at least N dB down, then the measurement returns a result of "----" and the arrows are shown at the primary marker.

## 5.12 RBW FILTER SHAPE

Selecting the RBW filter shape affects how the spectrum analyzer achieves the desired RBW. Different shapes affect which window function is used and how the bandwidth is defined. Not all shapes are available for all devices or in all modes. Here is a short description of the filter shapes Signal Hound provides.

**Flat Top** – When this shape is selected, a variable bandwidth flat top window defined at the 3dB point is used to achieve the desired RBW. The flat top window is selected by default and is recommended for the most accurate measurements as it has very low scalloping loss.

**Nuttall** – When Nuttall is selected, the analyzer uses a fixed bandwidth Nuttall window defined at the 3dB point and powers of two FFTs with zero-padding to achieve discrete RBW values. Nuttall windows offer the fastest sweeps with the lowest number of points in the sweep to achieve the RBW selected. The downside of the Nuttall shape is the high scalloping loss at around 0.8 dB.

**CISPR** – When CISPR is selected, the analyzer uses a Gaussian window defined at the 6dB bandwidth point and zero padding to achieve the selected RBW. This shape is commonly used for EMC/EMI precompliance measurements.

## 5.13 USING THE MEASURING RECEIVER UTILITY

The Spike software provides the functionality of a measuring receiver to make tuned RF level measurements (TRFL). TRFL measurements are useful for characterizing attenuators, signal generators, or any device on which a user wants to measure the accuracy of incremental steps in the output power.

TRFL measurements are capable of making more accurate power level readings and carrier frequency readings than in standard swept analysis mode and is capable of measuring power to much lower levels than in swept mode.

The measuring receiver utility can be accessed through *File Menu*  $\rightarrow$  *Utility*  $\rightarrow$  *Measuring Utility*. Enabling the utility will bring up the dialog box shown below.

Measuring Receiver	8 ×
Synchronous Level Detector	
Center Freq	50.000000 MHz
Amplitude Range	
High Power Range	
Mid Power Range	
Low Power Range	
RF Frequency	50.000003 MHz
RF Power	-10.211 dBm
Relative Power	-9.992 dB
Average Relative Power	-9.987 dB
Sync	Done

Figure 75: Measuring Receiver Control Dialog

### 5.13.1 Measurement Procedure

This section outlines the procedure for making TRFL measurements with the measuring receiver utility.

- 1. With the Signal Hound device connected to the PC and application software running, select *Measuring Receiver* from the *Utilities* file menu.
- 2. The measuring receiver will open and perform a 3-second calibration. Wait for this calibration to finish and connect the unit under test (UUT).
- 3. Prepare the UUT by selecting the maximum output power and center frequency of the device. Ensure the UUT output is a CW signal.
- 4. Prepare the software by entering the center frequency of the UUT and pressing *Sync* which recalibrates the measuring receiver for the new center frequency.

*Note:* For correct operation, ensure the frequency entered is close to the output frequency of the UUT.

After step 4 above, verify the RF Power and RF Frequency readouts are correct and ensure the Relative Power readouts are stable and very close to zero. A user is now ready to begin making stepped output power measurements. Perform the following steps for each output power level step.

- 5. Decrease/step the output power level of the UUT by no more than 10 dB.
- 6. Record any relevant readouts.
- 7. If the measuring receiver suggests recalibrating the device at a new power range, do so now. Recalibration takes about 3 seconds and is necessary to make continued accurate measurements to lower power levels.
- 8. Return to step 5.

To start the test over, select a new center frequency or press the *Sync* button and start over from step 1.

Be careful of IF overload messages which warn that the UUT output power is too large for the current power range. Avoid this by either decreasing the UUT power or pressing the *Sync* button to return the measuring receiver utility to the highest power range.

As the output power of the UUT, the measuring receiver prompts the user to enter new power ranges. The ranges are finite and a warning will be issued if the user has stepped over a range. To resolve this, increase the UUT output power slowly until entering the next lower power range.

# 5.14 TIPS FOR BETTER MEASUREMENTS

Signal Hound spectrum analyzers have internal gain and attenuation settings that are automatically adjusted for the selected reference level. While the software allows the user to manually control these settings, the AUTO value should be used for nearly all measurements. Manual control may place the compression point below the reference level, add spurious or residual signals, or raise the noise floor.

There are times when a user wishes to increase the attenuator by 5 or 10 dB to improve linearity. This can be important for reducing the amplitude of intermodulation products. Rather than changing the attenuator setting, simply change the reference level. This is easier and more predictable than manually controlling the attenuator.

For the best sensitivity and lowest noise floor, set the reference level at, or just above, the maximum input amplitude. To improve linearity and reduce intermodulation products, set the reference level 10 or 20 dB above the signal level.

For narrow-band and CW signals, the noise floor comes down approximately 3 dB for each decrease in RBW. When measuring low-level CW signals, narrower RBWs are recommended.

For maximum sensitivity, a reference level of -50 dBm or lower is recommended. This will set the attenuator to a minimum and set the internal gain to a maximum.

When the detector is set to "average" this is the equivalent to setting the minimum VBW for the current setup. This will have the lowest peak-to-peak noise floor but will also average intermittent signals. Set VBW to auto and the detector to "MIN/MAX" or MAX to measure pulsed or intermittent signals.

For making average power measurements, make sure the detector is set to "average" and "power." If the signal is modulated, either set the RBW wider than the modulation, or center the signal and use the channel power utility.

# **6** Additional Features

The Spike software has several useful utilities. They are described here.

# 6.1 SCPI

The Spike software is programmable using SCPI commands. The Spike software maintains a SCPI TCP/IP socket connection on port 5025 (default). The connection can be disabled, and the port number can be changed through the preferences menu.

When a SCPI connection is active and a command is received, the Spike software enters a remote operation mode. When in remote operation, a modal dialog appears in the center of the Spike application. To return to local operation either press the "Return to Local" button or close the dialog. If another SCPI command is received, the dialog will reappear.

For programming information regarding Spike and SCPI see the Spike SCPI programming manual in the SDK download located on the Signal Hound website (on any device download page).

🔝 SCPI 🧫	
Spike is in remote mode. Close this dialog to return to local operation	n.
Return to Local	ו

Figure 76: SCPI Remote Mode Active Alert Dialog

## 6.1.1 SCPI Log

When logging is enabled, SCPI commands received, and responses sent by Spike are logged with timestamps. The log can be viewed in a non-modal dialog via the *Utilities*  $\rightarrow$  *SCPI Log* menu option.

In the upper left of the dialog, running counters show the number of commands received, responses sent, and total messages handled.

The log's active state is shown in the upper right of the dialog. It can be enabled or disabled in the SCPI preferences. A few milliseconds of overhead can be saved by disabling SCPI logging.

The log can be exported as a plain text file using the "Export" button.

The log can be cleared using the "Clear" button.

Figure 77: SCPI Log

## 6.2 PRINTING

Use the *File*  $\rightarrow$  *Print* menu to print exactly what is shown on the graticule. Be careful, if the software is still updating traces, the software may not print the desired trace. Use the print preview option to see exactly what will be printing. Use the Single button to stop the measurement updates to guarantee you print the desired signal.

Tip: The active color scheme is used for printing as well. Under the **View – Colors** menu, we provide a simple printer friendly color scheme to help save ink!

# 6.3 SAVING IMAGES

Use the *File*  $\rightarrow$  *Save to Image* menu option to save the current graticule view as a PNG, JPG, or BMP image. The resulting resolution of the image is the exact resolution of the graticule at the time of the save. To obtain the highest resolution image, maximize the software and slide the control panels out of the way. The active color scheme is used in the resulting image.

# 6.4 CORRECTION DATA

Use the *File*  $\rightarrow$  *Manage Correction Data* menu option to open a dialog that provides some useful correction data management functions.

Manage Correction Data	ବୃ	23
View Correction Data		
Explore directory storing cached correction files for Signal Hou	und de	evices.
Clear Correction Data		
Remove all cached correction files. Use only if instructed.		

Figure 78: Manage Correction Data Dialog

Correction data is pulled from some Signal Hound devices and cached locally for faster access. It is sometimes necessary to manage this data. For example, when a device is recalibrated a new correction file is generated for it, rendering the old one obsolete. Simply removing the old one will cause the software to pull the new one from the device. This is done using the "Clear Correction Data" button.

There are two available functions.

- 1) **View Correction Data**: This opens the directory on your computer which contains correction data files for Signal Hound devices in Windows Explorer.
- **2) Clear Correction Data**: This removes all correction data files for Signal Hound devices that have been cached on your computer. When a device is connected, its correction file will be re-cached.

You should only use these functions if you have recently had your device calibrated or if instructed by Signal Hound Support. Not all analyzers store calibration data on the device. If you have an older SA series device, make a copy of the calibration data before clearing any data.

# 6.5 ETHERNET DEVICES

Use the *File*  $\rightarrow$  *Manage Ethernet Devices* menu option to open a dialog that provides Ethernet device management functions.

Manage Ethernet Devices			?	$\times$
SM200C #1 SM200C #2	Ad	d Device		
	Dele	ete Device		
	Device Name	SM200C #1		]
	Host IP Address	0.0.0.0		]
	Device IP Address	192.168.2.10		]
	Port		51665	]
				_

Figure 79: Manage Ethernet Devices Dialog

For devices that connect via Ethernet, such as the SM200C and SM435C, the device IP address and port must be known in advance prior to opening the device. This dialog allows you to register several networked devices in the Spike software by specifying the IP and port address of the device. When a device is added to this list, it will appear in the File->Connect menu.

When adding a new device to this list, the default IP and port addresses are used. If you haven't modified your devices IP/Port, use the default values. The host IP address refers to the network interface that the device is connected to. 0.0.0.0 is the address used for 'any' which means that the PC will resolve this later. This value should be used in most cases.

Note that a device does not need to be connected to the computer to save or edit a device in this list, but the device will need to be connected to connect via File > Connect.

There are two available functions.

- 1) Add Device: This adds a new Ethernet device with default settings.
- 2) Delete Device: This removes the Ethernet device currently selected in the list.

# 6.6 PATH LOSS, LIMIT LINE, AND ANTENNA FACTOR FORMAT

All correction and limit tables are loaded into the software in CSV file format. This means each value is separated by a comma, and each logical set of values is separated by a newline. These types of files can be edited in spreadsheet document software or even a basic text editor.

Values provided are then linearly interpolated.

**Path loss tables** are [Frequency (MHz), Gain (dB)] pairs which describe the response of one or more components in the system. A path loss table might look like this

20.0, 0.1 200.0, 0.4 2000.0, 1.7 ...

Path loss tables are applied to the received sweep before being displayed or processed. The first and last values are extended to the start and stop frequencies of the sweep configured. It is good practice to prefix and postfix your table with zeros if you do not wish to extend your corrections beyond the defined frequency range.

**Antenna factor tables** are [Frequency (MHz), Antenna Factor (dB/m)] pairs which describe the response of an antenna. These tables have the same structure and behavior as path loss tables except they change the units of measurement to one of electric field strength. Electric field strength measurements are used in compliance testing.

Limit lines are of the form, [Frequency (MHz), Limit(dBm)]

Limit lines are only tested within the frequency range of the lowest and highest frequency point.

The limit lines are drawn on the graticule and each sweep is tested against them. Indicator text will appear in the center of the screen denoting whether the trace currently shown passes or fails the limit line test.

Here is an example of a path loss CSV file built in a spreadsheet program.

732	0
738	2

And here are the resulting path loss corrections applied to incoming traces for a 10MHz span centered at 735 MHz:

We can see the linear interpolation between the two points and flat lines off the sides.

## 6.7 MANAGING PATH LOSS TABLES

The path loss table dialog provides a user with the ability to manage up to 7 path loss tables and one antenna factor correction table. Loss tables are [frequency, dB] pairs which characterize loss or gain in the system. Typical use of loss tables corrects for cables, amplifiers, or attenuators. Antenna factor tables are [frequency, dB/m] pairs which describe the response of an antenna and are generated by calibrating an antenna. Only one antenna factor table can be loaded and should be loaded into the appropriate spot to ensure the software recognizes its presence.

See <u>Path Loss, Limit Line, and Antenna Factor Format</u> for more information.

Tables can be loaded and removed through the dialog. The file names of the tables are stored with the presets and are loaded automatically when loading a preset later. If the file name has changed or moved since the preset was saved, then the table will be removed.

## 6.7.1 When Are Path Loss Tables Applied?

Path loss tables are applied in two ways.

- 1) **Full**: The user provided path loss tables are applied at each output frequency point in the measurement.
- 2) **Single**: Path loss applied at a single frequency: The measurement is corrected for a single frequency, usually the center frequency of the configured measurement. This is equivalent to a flat dB offset across the measurement.

Each measurement mode in Spike applies path loss in one of the ways mentioned above. Below is a list of each measurement mode in which path loss is applied and denotes which application method is used.

Measurement Mode	Path Loss Method
Swept spectrum analysis	Full
Real-time spectrum analysis	Single
Zero-span	Single
Harmonics viewer	Full
Scalar network analysis	Full
Phase noise	None
Modulation analysis	Single
EMC precompliance	Sweeps: Full, QP Detector: Single
Analog demod	Single
Interference hunting	Full
Measuring receiver	None
Spectrum Emission Mask	Full

## **6.8 MANAGING LIMIT LINES**

📶 Manage Limit Lines			?	Х
Limit Line 1 Limit Line 2 Limit Line 3 Limit Line 4	Enabled Name Trace	✓ Limit Line 1		1
Limit Line 5 Limit Line 6	Туре	Upper		-
	Convert To	Relative		·
	Interpolation Color	Linear		-
	Pause On Break			
	Show Line Show Result	$\checkmark$		
	Offset (dB)		0.0	00
	Points To Build			10
	Build Line	Build From Trace		
	Modify Points	Edit		
	Copy To			•
	Number of Points	U Pts		

#### Figure 80: Limit Line Manager

The limit line dialog provides a user the ability to configure up to 6 limit lines. Each limit is stored as frequency amplitude pairs. The points tested against the sweep are interpolated from the limit line values. The limit line can be configured to act as a maximum or minimum threshold. Limit lines can be loaded from CSV files. See <u>Path Loss, Limit Line, and Antenna Factor Format</u> for more information. Limit lines are also stored in the presets.

### 6.8.1 Settings

- Enabled Activates/deactivates limit line.
- **Name** The name of the limit line. This will be displayed on the plot if "Show Result" is checked.
- **Trace** Sets the trace the limit line acts upon.
- **Type** Sets whether the line is an upper or lower bound.

- **Reference** Sets whether the frequencies are specified as fixed or relative (to center) values.
- **Convert To** Converts the limit line's reference mode between fixed and relative. This recalculates the points based on their current position on screen.
- **Interpolation** Specifies whether linear or logarithmic interpolation is used.
- **Color** Sets the color of the limit line.
- **Pause On Break** When enabled, Spike will switch to single step mode if the limit line is violated.
- **Show Line** Sets the visibility of the line on the plot.
- **Show Result** Sets the visibility of the name and pass/fail status on the plot.
- **Offset** Sets an offset to be applied to all the points in the line.
- **Points To Build** Specifies how many points should be used when building a line from the current trace.
- **Build Line** Constructs new limit line data from the current trace, using the number of points set in "Points To Build".
- **Modify Points** Opens the limit line table editor for editing individual points.
- **Copy To** Copies the limit line's points, type, reference, and offset to the selected limit line.
- **Number of Points** Displays the number of points in the limit line.

## 6.9 AUDIO PLAYER

Using the *Utilities*  $\rightarrow$ Audio Player menu option, a user can utilize the software to play broadcast audio. When using Spike<sup>TM</sup> for audio playback, the dialog box below will appear.

🖟 Audio Player				8 23
Frequency	Audio		Recording	
Center Freq 97.100000 MHz	Audio Type	FM 👻	Save Directory	Select
	Bandwidth	120.000000 kHz		uments/SignalHound/audio_rec
+20 Hz	Low Passe	8.000000 kHz	File Prefix	AUDIOREC
-1 kHz +1 kHz	High Pass	20.000000 Hz	Record	Start
-20 Hz	Deemphasis (us)	75.000		

#### Figure 81: Audio Player

Change the center frequency using the arrow keys, pressing the fine tune frequency adjustments, or through manual entry. The initial center frequency is the same center frequency displayed on the graticule when selecting the Audio Player menu option. A user can also manually change or select various bandwidths and the type of demodulation. A user may also specify audio low pass and audio high pass filter cutoff frequencies.

All audio related variables other than center frequency are saved with presets.

TRY THIS: Utilize sweep mode to find a signal of interest and start the Audio Player to immediately begin listening at that frequency.

# 6.10 FREQUENCY DIFFERENCE METER

Spike provides a frequency difference utility to determine the frequency difference between two stable oscillators. The frequency difference is displayed as a digital readout as well as a zero-centered meter with selectable parts in 10<sup>6</sup>, 10<sup>7</sup>, 10<sup>8</sup>, 10<sup>9</sup>, 10<sup>10</sup>, and 10<sup>11</sup>. The frequency difference meter accepts frequency inputs across the entire operating frequency range of the spectrum analyzer. The types of measurements available through the frequency difference meter include, measuring, offsetting, and adjusting your oscillator, and analyzing the stability of your oscillator.

K Frequency Difference	Meter	8 ×
-0.35948 Hz		Measured - Desired
-10 -5		5 10
Desired Frequency		10.000000 MHz
Scale (x10 <sup>A</sup> N)		
✓ 6 7		
9		
11		ОК

Figure 82: Frequency difference meter observing frequency difference between two 10MHz oscillators

Ensure your spectrum analyzer has an external reference connected to the input BNC port and is activated through the file menu. If an external reference is not connected and active, the internal timebase of the spectrum analyzer is used. Connect an oscillator to the input RF port on the spectrum analyzer and set the desired frequency setting. Set the reference level to about 5dB above the input signal level. Observe the frequency offset (Measured – Desired). As you adjust the input oscillator, use the scale radio buttons to adjust the frequency range displayed on the output meter. As the scale is

increased, the damping increases on the output meter. Allow several seconds for the meter to settle on the smallest scale settings.

# 6.11 ADJUSTING YOUR TIMEBASE

Using the timebase adjust utility, you can semi-permanently adjust your Signal Hound's internal 10MHz oscillator. Access the adjustment utility using the *Utilities -> Timebase Adjustment* option.

Timebase Adjustment	8 ×
Frequency Offset -0.09320 Hz	
Input Frequency	10.000000 MHz
Reference Level	0.000 dBm 👻
Adjust Timebase	Restore Default
	Done

Figure 83: Timebase Adjustment Utility

The utility allows you to adjust the internal oscillator to a high precision external CW source or oscillator through the RF input port. Using the utility, the Spike software can store an adjustment for the serial number of the device to use for all future program invocations. Spike stores this adjustment for the serial number on the local PC. If you connect a difference device or use a different PC, the adjustment will not be applied.

If you wish to restore the default factory adjustment settings, simply press the *Restore Default* button at any time. You do not need to provide an input CW signal to restore the factory adjustment setting.

Steps:

- Connect the high precision source/oscillator to the input RF port on the spectrum analyzer.
- Disconnect any cables connected to the reference in/out BNC port.
- Set the reference level about 5dB higher than the expected input signal.
- Set the input frequency to match the input oscillator frequency.
- Ensure the frequency offset reading is stable and reasonable before adjusting the timebase.
- Press the *Adjust Timebase* button.
- After adjusting, the frequency offset shown will reflect the new adjustment.

# 6.12 SPUR REJECTION

When spur rejection is on additional signal processing is enabled attempting to remove spurious signals which are the result of mixing products. Spur rejection roughly doubles sweep time and is great for cleaning up a steady signal, but should not be used for pulsed RF, or modulated signals. Spur rejection is not available in real-time mode.

## 6.13 NETWORKED SPEED TEST

This utility tests the speed of a connected networked device, such as an SM200C or SM435C. It shows the result in Gigabits per second, and updates each second.

Networked device to PC throughput is measured using UDP jumbo packets. This utility can be used for troubleshooting. For the SM200C/SM435C, network speed should sustain > 8Gbps speeds.

J Networked Speed Test	?	×
8.850		
Gigabits / second		

#### Figure 84: Networked Speed Test utility

# 6.14 SM NETWORK CONFIGURATION

This utility is used to modify the network address of an SM200C or SM435C. The network address can be updated over USB or UDP. The device must be disconnected before configuration can occur.

## 6.14.1 Configuring Over USB

If configuring over USB, ensure the networked SM is connected to the PC with the provided USB cable. In the "Via USB" tab, press the "List Devices" button to show all networked devices connected to the PC over USB. If no devices are found, troubleshoot the USB connection to the PC.

Once the target device can be found with "List Devices", specify the target device serial number and new network settings you wish to apply to this device. Once finished, press the "Program Device" button. It will take a few seconds to program the new settings. At this point, "List Devices" should show the updated network settings.

When non-volatile is unchecked, the new settings will not persist through a device power cycle.

Configure SM200C/SM435C Network S	Settings	? >
Via USB Via Network		
Looking for devices S/N: 70100002 MAC: 64:62:66:B0:00:61 IP: 192.168.2.10 Port: 51665 1 device found.	Target Device Serial Target Device Addr Target Device Port Non-Volatile	70100002 192.168.2.10 51665
List Devices	Progra	am Device

Figure 85: Configuring the network address over USB.

## 6.14.2 Configuring Over UDP

When configuring over UDP, the new settings are sent in a broadcast UDP packet. For this reason, only a single SM should be connected to the local network interface. While specifying the "any" address often works, when possible, it is best to specify the host address directly. The update will report failed if changing to a new subnet, but the update may have still been successful.

🛴 Configure SM200C	/SM435C Network Settings	?	×
Via USB Via Net	work		
HostAddr	0.0.0.0		
Target Device Addr	192.168.2.10

	Configure		

Figure 86: Configuring the network address over UDP.

# 6.15 GPS CONTROL PANEL

The GPS control panel can be accessed from the Utilities menu.

The Spike software can utilize a GPS device to capture both timestamps and GPS coordinates. The GPS information can be utilized in several measurements, including sweep recording, mapping, LTE measurements, and more.

The GPS device can be one internal to a Signal Hound spectrum analyzer (such as in the SP145, SM200, and SM435 devices), or an external device. For GPS devices internal to Signal Hound spectrum analyzers, the GPS will auto-lock when the GPS antenna is connected, and the GPS controls are set to "Internal". External GPS devices can be connected over serial, (commonly serial over USB). Platform specific instructions are provided below for connecting an external GPS device. The NMEA sentences from the external GPS are parsed to determine the timestamps and coordinates.

GPS data is updated roughly once per second. The current GPS lock status can be viewed in the GPS control panel or in the status bar of the Spike application.

For internal GPS devices, the "Platform Model" can be selected. Choices are stationary or portable. Portable is recommended for any scenario where the spectrum analyzer is not stationary and allows the GPS to maintain lock when velocity does not equal zero (for instance when making drive test measurements).

GPS Control Panel ?		$\times$

Figure 87: GPS Control Panel

## 6.15.1 Windows

Connected COM devices will appear in the dropdown **COM Device**. Select the device that corresponds to the desired GPS unit. To refresh the list (if a GPS device is plugged in after opening panel), press the button **Refresh COM Devices**.

## 6.15.2 Linux

Enter the name of the serial device as represented in the file system under **Device Name**. For example, "ttyACM0". This name can be determined using a command like *ls /dev* | *grep tty*.

Pressing "Connect" attempts to communicate with the GPS device. The control panel will warn you if unable to detect the GPS device or the NMEA data does not match a valid form. The NMEA data must contain the RMC sentence to be considered valid form.

If an external GPS is connected, the GPS coordinates provided by the external GPS will override the ones provided by the SM.

Some messages you may encounter using the GPS control panel.

- Comm Error The software was unable to find a valid RMC string in the NMEA sentences. The primary cause for this is an invalid baud rate. Verify the baud rate is set correctly by looking in the properties window for the COM device in the device manager.
- Locked/Unlocked Echoes the lock status in the RMC string of either 'A' or 'V'. Coordinates are not used while unlocked.
- Unable to Connect GPS Verify the COM port and baud rate are correct before attempting to connect again. Ensure the device is configured properly on your system.

## 6.16 GPS DISCIPLINED TIMEBASE

(This section only applies to the SM series spectrum analyzers)

The SM can use its internal GPS to discipline the timebase and internal clocks. This enables more accurate and consistent frequency measurements as well as accurate time stamping functionality (when using the API). This discipline behavior is enabled by default and the user only needs to connect the supplied antenna to start this process.

When the SM is connected to the Spike software, an additional text field appears in the status bar indicating the current GPS status. The possible GPS states displayed are

- 1) **GPS Unlocked** Either the GPS antenna is disconnected or is connected and hasn't achieved lock yet. After connecting the antenna expect several minutes for the lock. If you do not see a lock after several minutes, you might need to reposition the antenna.
- 2) **GPS Holdover** The GPS is unlocked but is using a holdover value from the last time it was disciplined. A typical message here is **GPS Holdover (3d19h)** denoting the holdover value is 3 days, 19 hours old.
- 3) **GPS Locked** The GPS has achieved lock but has not yet disciplined the SM. The GPS must be locked for several minutes before discipline occurs.
- 4) **GPS Disciplined** The SM has been disciplined to the GPS. If the GPS antenna remains connected, the GPS will continue to discipline (it will usually update every few minutes).

Once GPS disciplining has occurred the software records the last known timebase correction value, which will be used in future program invocations when a GPS is not present. This stored value is referred to as the GPS holdover value. This value is stored in the C:\ProgramData\SignalHound\cal\_files directory (hidden directory) and is named of the form sm########gps.bin. It is safe to delete this file.

The state machine below explains how to determine how the SM timebase is being corrected at any given time. To summarize the state machine, a timebase correction value is generated during production and is used until the GPS disciplines the system and is stored as a holdover value. If the device is recalibrated/adjusted at any time, the newer calibration value will be used over the holdover value. (All timebase correction factors are timestamped and the newest one is used)

Figure 89: State machine for GPS disciplining for the SM.

# 6.17 BB60D GPIO CONTROLS

The UART output port on the BB60D can be controlled in Spike using the BB60D UART Controls.

- **UART Rate** The UART clock rate can be selected from several predefined values.
- **Imm Config/Write** The UART output on the BB60D can transmit up to 8 bits. The immediate controls can be used to directly transmit a byte over the UART port.
- **UART Sweep** Up to 8 UART bytes can be transmitted at specific frequencies in a sweep. This is useful for intra-sweep antenna switching or controlling an external device during a sweep. When enabled, a UART byte is transmitted when the sweep frequency crosses a user defined frequency. When enabled, this functionality will override the 10MHz output reference if configured.

# 6.18 SP145 GPIO CONTROLS

# 6.19 SM GPIO CONTROLS

The GPIO on the SM200 and SM435 spectrum analyzers can be controlled in Spike. There are two GPIO output modes that can be configured, fixed and sweep. Fixed mode sets the GPIO output pins to fixed outputs, while the sweep mode changes the GPIO pins at different points in the sweep. The GPIO can be configured using the SM GPIO Controls found in the File->Utility menu.

The DB15 port on the SM spectrum analyzers has 8 GPIO pins that can be configured. Please see the user manual for the SM200 and SM435 for a description and pinout of the DB15 connector.

### 6.19.1 Fixed Output Mode

Fixed GPIO mode is ideal for manually controlling external devices with up to 8 configurable GPIO pins.

In fixed output mode the GPIO pins are fixed. Device measurements are stopped when updating the GPIO output pins. The GPIO remains fixed until disabled or modified.

### 6.19.2 Sweep Output Mode

The sweep output mode is ideal for switching between multiple antennas during a single sweep or controlling any other device via GPIO mid sweep.

In sweep output mode, a sequence of frequencies and GPIO pin values are configured. When the sweep crosses the specified frequency, the GPIO pins are configured to the pin values associated with that frequency. The first frequency should be 0 Hz ensuring the GPIO pins start at a specified value.

Up to 8 discrete frequency/GPIO steps can be configured.

The resolution at which the frequency values can be configured depend on the measurement type. In standard sweep mode, the frequency resolution is 40MHz, and in real-time swept mode, the frequency resolution is 160MHz. Any attempt to specify frequencies at smaller resolutions will result in unspecified behavior.

## 6.20 DEMO MODE

If Spike is opened with no device connected, a dialog will appear with the option to launch the demo device. This will allow several analysis modes to operate with simulated signals, with most functionality available.

Analysis modes that can be demoed are Sweep, Zero-Span, Digital Demodulation, Interference Hunting, Spectrum Emission Mask, Harmonics, and Mapping.

Figure 91: License Manager dialog.

The License Manager dialog is used to add, activate, remove, and see details about licenses stored on the machine.

All licenses in use locally are displayed in the list on the left, with their associated serial number. Expired licenses are shown in red text. Clicking on a license will show its details on the right. It will also enable actions to be performed on it with buttons on the right.

To enable a licensed feature, an active license must be added to the local store. Instructions on how to do this are below.

## 6.21.1 Adding and Activating a License

After purchasing a Signal Hound software license, you will receive a license key that is used to activate the license in Spike. An internet connection is needed for activation, but from then on the license is stored locally and no internet connection is needed.

- 1. First, make sure Spike is up to date. You can download the latest version here.
- 2. Navigate to your <u>account page</u> on the Signal Hound website.

Figure 93: Viewing licenses in My Account portal on Signal Hound website.

4. Click the "Copy" button to copy the license key to your clipboard.

Figure 97: Add License dialog.

8. When prompted, enter the serial number of the Signal Hound spectrum analyzer you would like to associate with this license. When the license becomes associated with a spectrum analyzer via its serial number it is considered active,

## 6.21.2 Removing a License

To remove a license, select it from the list, and press the *Remove License* button. This only removes the license information from the local machine, but does not affect the license itself, which can be re-added on this or another machine.

## 6.21.3 Refreshing a License

If a license was renewed or otherwise altered, the local information can be updated to reflect these changes by pressing the *Refresh License* button.

# 7 Plotting

This section describes the various plots and displays in the Spike software.

## 7.1 BASIC PLOT

Several plots in the Spike software adhere to a standard interface. Currently, plots in the following modes adhere to this interface.

• Zero-span (except CCDF)

#### Plotting | Basic Plot

- Digital modulation analysis
- Analog Demod
- Spectrum Emission Mask
- Bluetooth® Low Energy
- WLAN
- LTE
- Noise Figure
- Sweep/Realtime (zoom features only)

Measurement modes not listed here will have custom plots with their own unique interface.

This section describes the features of this standard plot. The plot below is the AM vs Time plot from zero-span and key points on the plot are labeled and described below.

Figure 98: Basic plot areas of interest.

- A. Main plot window.
- B. Marker, left mouse click anywhere in the plot border to place a marker on the closet point in the graph.
- C. Delta marker, enabled through the context menu. Displays the reference point to which the marker is compared.
- D. Marker readout, displays either the position of the marker or if the delta marker is enabled, the difference between the marker and the delta marker reference.
- E. Plot Title.
- F. X-axis label. Might contain additional measurement information relevant to the current plot.
- G. Reference level and zoom indicator asterisk.
- H. Error annunciators.

I. Region to the left of the y-axis. In this region the user can control the y-axis scale.

## 7.1.1 Zoom and Axis Manipulation

There are four primary ways to manipulate the x/y axis of the plot.

1) Left click and drag of the mouse within the plot border. This lets the user select a specific region of interest to display. This can only be performed after enabling drag zoom in the context menu.

Figure 99: User is dragging a zoom region around the on period of a pulse.

- 2) Click and drag to the left of the y-axis, or below the x-axis. This allows the user to move the reference level or time of the plot.
- 3) Hover over the area to the left of the y-axis or below the x-axis and scroll the mouse wheel. This contracts/expands the y-axis or x-axis.
- 4) In the context menu, select "Set Axes" and manually define the ranges of the x-axis and y-axis.

When the user has modified the axes in any way, an asterisk appears next to the unit of the plot indicating that the user has overriden the default scale. The user can use the context menu to revert to previous or the default plot scales.

## 7.1.2 Markers

A single marker is available for control. Left clicking anywhere within the plot border will place the marker on the closest point. Further control of the marker can be performed by using the left/right arrow keys to move the marker a single index left or right on the current graph. If the plot contains multiple graphs/lines, using the up/down arrow keys will jump the marker between the two graphs.

When a marker is active, selecting delta marker in the context menu places a reference marker at the current marker location. Selecting delta marker again disables the marker.

## 7.1.3 Context Menu

The context menu is activated by right clicking anywhere within the plot. A description of each context menu item is provided below.

Figure 100: The context menu is displayed after right mouse clicking anywhere in the plot.

- **Previous Zoom** Restores the previous level of zoom/scale. Additionally, it will show how many levels of user zoom/scale are active.
- **Auto Zoom –** Restores the default scale.
- **Enable Zoom/Disable Drag Marker** When enabled the marker drag functionality is replaced with the ability to drag a zoom window on the plot.
- **Set Axes –** Manually define the ranges of the x-axis and y-axis.
- **Peak Search** Move the marker to the location of the largest y-value. If the marker is disabled, enable it.
- **Minimum Search** Move the marker to the location of the smallest y-value. If the marker is disabled, enable it.
- **Place Delta Marker** If the marker is enabled, place the reference marker at the current marker position.
- **Disable Marker –** Disable the marker and delta marker if enabled.
- **Export** Exports all graphs shown in the plot into a CSV file.
- **Save as Image –** Save the current plot as an image.

# 7.2 SPECTROGRAM

Figure 101: FM broadcast

The software offers a spectrogram display, also called a waterfall display, which displays several sweeps over time. The spectrogram is available in sweep, real-time, and interference hunting measurement modes.

The spectrogram stores a selectable number of sweeps in a scrollable history. Each horizontal line in the spectrogram represents a single sweep. The x-axis represents frequency, the y-axis represents time, and amplitude is represented using a color-coded scheme.

Enable the spectrogram from the toolbar. The spectrogram can be resized by using the mouse to drag the splitter bar below the spectrogram display.

Left-clicking on the spectrogram display places a marker on the sweeps, providing a method of measuring the frequency, amplitude, and time of any event stored in the spectrogram. The marker readout appears in the upper right of the display. The marker can be disabled in the right-click context menu.

Right-clicking on the spectrogram display brings up a menu with four options.

- **Preferences** Opens the preferences menu described below.
- **Clear Spectrogram** Clears the current spectrogram display.
- **Delta Marker** Sets the delta marker at the currently selected position.
- **Auto Scale** Sets the min and max value of the scale to the min and max values of the currently displayed data.

The available preferences and a description of their function is below.

- **Sweep Depth** The number of spectrums stored in the spectrogram. Once this number of spectrums has been accumulated, the oldest spectrum is removed to make room for a new one. Each horizontal pixel line represents one stored spectrum. The current spectrum count and depth is displayed in the upper left of the spectrogram.
- **Time Density** Specifies the minimum amount of time each stored spectrum represents. If the device is sweeping at a faster rate than this value, several sweeps will be accumulated to create the single spectrum stored in the spectrogram.
- **Mouse Wheel Scroll Pixels** Controls the scrolling speed of the display when using the mouse wheel to scroll.
- **Auto Scrolling** Controls the behavior of the display when you are looking at past events (scrolled back through spectrums). If disabled, the plot will not advance when new spectrums are added to the display. (Note: Once the maximum number of spectrums has been met in the plot, the display will scroll regardless of this setting.
- Marker Active Enables/Disables the marker.
- **Color Scale** Switch between a color spectrum or gray scale gradient.
- Scale to Ref When enabled, the reference level and bottom of the graticule are used at the min and max amplitudes that are mapped onto the color gradient. When disabled, the min and max color settings are used (see below).
- **Min Color (dBm)** When *Scale to Ref* is disabled, this value overrides the bottom of the graticule as the minimum amplitude that is mapped onto the color gradient.
- **Max Color (dBm)** When *Scale to Ref* is disabled, this value overrides the reference level as the maximum amplitude that is mapped onto the color gradient.

## 7.3 PERSISTENCE

The persistence display is helpful for viewing spectral density over time. Instead of showing a single trace, persistence uses several sweeps to create an image where color is representative of how often a signal appears. The software uses the color spectrum to represent density over time. If a signal rarely occurs in a location, a light blue is used to color the trace. If a signal continues to appear in the same location the color will change from blue to green to red. Red is an indication of a signal persisting in one location for a good deal of time.

There are two types of persistence displays, one for standard spectrum analysis and one for real-time analysis. For standard spectrum analysis, persistence is simply an accumulation of the most recent sweeps. This display is shown below.

#### Plotting | Persistence

Figure 103: Real-time persistence display of a wireless router and Bluetooth® headset coexisting in the ISM band.

In real-time mode, persistence is the accumulation of 2/3<sup>rd</sup> of a second worth of spectrum data. This means, each update in the persistence display is the accumulation of the result of 1600 – 400000 FFTs.

# 8 Troubleshooting

If you experience a problem with your Signal Hound on Windows systems, please try these troubleshooting techniques. On Linux systems, please consult the README included in the download.

This section will contain general troubleshooting tips as well as device specific tips. If a troubleshooting tip applies to a specific device, the tip will make note of it.

# 8.1 THE SPIKE SOFTWARE REPORTS "DEVICE NOT FOUND" (ALL DEVICES)

Try the troubleshooting tips here first, if these do not work, see the troubleshooting tips for your specific device below.

Ensure the device is plugged in and the LED is a solid green color. If it is not, unplug then plug in the device. Once the green light turns on, use the *File* menu to try to connect the device again.

# 8.1.1 The Device Light is solid green and still will not connect.

Early BB60A units sometimes require a power cycle after the PC has restarted or woke up from hibernation. For these units, try a power cycle before restarting the software.

If it is the first time the device has been connected to a PC, the device might require many seconds to identify and install the latest drivers for the device. Usually, a PC will notify you if this identification process is occurring and when it is finished. Wait until the device has been properly identified by your PC. You can verify this by finding the device in the device manager. It will bear the Signal Hound name if it has been identified.

If a power cycle still does not allow you to connect the device, it is possible the device drivers were not successfully installed. See the <u>Driver Installation</u> section for more information.

# 8.1.2 The device is connected but does not exhibit a solid green light.

For the BB series spectrum analyzers,

- Power cycle the device by disconnecting the USB cable from the spectrum analyzer end. If the provided cable is a USB y-cable, ensure both USB ends are connected to the PC before connecting it to the device.
- Update <u>power management settings</u>.

• If the device is connected to a charging port, attempt operation after moving the device to a non-charging port. For devices with a y-cable (SA124 and BB60) this should only affect the main data cable, not the auxiliary power cable.

For the SA series spectrum analyzers,

- Disable any anti-virus software. Aggressive anti-virus software has been known to interfere with Signal Hound devices.
- Ensure the driver was configured correctly by your system. In the device manager, find "Serial Convert A/B" in the "Universal Serial Bus Controllers" tab. Right click and select properties, select the "Advanced" tab and ensure the "Load VCP" box is unchecked.

# 8.2 THE SPIKE SOFTWARE REPORTS "DEVICE NOT FOUND" (BB60, SM200A/B, SM435B)

Ensure the LED on the device is solid green. If the device is solid green, ensure the drivers have been properly installed by going to the "Device Manager" expanding the "Universal Serial Bus Controllers" tab and looking for the Signal Hound xxxx while the device is plugged in.

If the LED on the device is not solid green after plugging it in, then it might be necessary to update your USB 3.0 drivers for your PC. You can upgrade your drivers using these steps.

Fully update your PC through the Windows update utility. Also look for USB drivers provided by your manufacturer by searching for your PC model number on the manufacturer website or on your favorite search engine. Only download drivers found on trusted websites.

Unplug the device before starting any USB driver updates, restart your PC afterwards, and verify operation.

If you continue to experience issues, contact Signal Hound.

# 8.3 THE SPIKE SOFTWARE REPORTS "DEVICE NOT FOUND" (SA44, SA124)

Ensure your USB cables are properly secured and the LED on the device is solid green.

Ensure you have installed the USB drivers. Download them from the related downloads section on the Spike download page.

Ensure the driver was configured correctly by your system, In the device manager, find "Serial Converter A/B" in the "Universal Serial Bus Controllers" tab. Right click and select properties, select the "Advanced" tab and ensure the "Load VCP" box is unchecked.

Ensure the devices are properly powered, some laptops/notebooks may not provide sufficient power by default. Go to the "Power Options" menu found in the control panel and enable the "High Performance" power plan.

Disable any anti-virus software. Aggressive real-time anti-virus software has been known to interfere with Signal Hound devices.

# 8.4 THE DEVICE DISCONNECTS DURING OPERATION

There are many reasons a Signal Hound device might experience an issue during operation. Most issues are USB related issues and some might be related to PC performance. Here are some things you can try to eliminate this behavior.

- Disable any anti-virus software. Aggressive anti-virus software has been known to interfere with Signal Hound devices.
- Update <u>power management settings</u>.
- Update your USB drivers, see the "Device Not Found (BB60, SM200A/B, SM435B)" troubleshooting tip.

# 8.5 THE DEVICE IS NOT VALID

In the event the device ceases to operate or becomes corrupted, the Spike application might tell you the device does not appear to be valid. Before contacting us, attempt to power cycle the device and restart your computer to ensure nothing else is causing this issue. If the issue persists, please contact us.

# 8.6 THE DEVICE REPORTS "IF OVERLOAD" ON PROGRAM STARTUP

Some Signal Hound devices might report an IF overload condition for a short time after launching the software or connecting the device through the File menu. This condition is considered normal and is part of the normal hardware startup process. This condition should last typically less than one second of operation.

# 8.7 POWER MANAGEMENT SETTINGS

It is recommended to perform this step with the Signal Hound spectrum analyzer disconnected from the PC.

Many laptops and PC's are initially configured for energy savings. The Signal Hound spectrum analyzers are high performance USB devices and can benefit in stability and operation by configuring the PC or high-performance operation.

To change your power management settings to high performance you need to access the "Power Options" menu found in the control panel menu. You can also reach the Power Options menu by hitting the Windows key and searching for "Power Options".

Once in the Power Options menu, you need to select the "High Performance" power plan. You may need to click "Show Additional Plans" to show the high-performance option, and/or "Advanced Settings" to show power plans.

You may also need to disable "Selective Suspend" in the "USB Settings" section of the Advanced Power Options settings menu.

# 8.8 ERROR CODE 48: THE SOFTWARE FOR THIS DEVICE HAS BEEN BLOCKED

Instructions for BB60C

The device is not able to be found by the Spike software and the driver details for the device reports *"Error Code 48: The software for this device has been blocked because it is known to have problems with Windows. Contact the hardware vendor for a new driver."* 

If you are seeing this message, it is likely the device drivers were improperly installed during the Spike installation procedure. Re-installing the drivers manually has been effective at resolving this issue. First uninstall the current driver by connecting the BB60C and navigating to the "Device Manager". Under the "Universal Serial Bus Controllers" tab, find the BB60C. Right click and uninstall the driver. If there are any checkboxes that additionally state to delete or remove the BB60C driver completely, select those as well.

Once the driver has been uninstalled, disconnect the BB60C from the PC. Now we need to manually reinstall the driver. Navigate to the Spike installation directory at C:\Program Files\Signal Hound\Spike and find the drivers folder. If you are on 64-bit system select the x64 folder, and select the x86 folder if you are on 32-bit Windows. Right click the cyusb3.inf file and select install. If the installation succeeds, reconnect the BB60C and try launching the Spike software.

# 8.9 THE DEVICE DOES NOT WORK IN MY WINDOWS VIRTUAL MACHINE (BB60C ONLY)

The Signal Hound devices are not supported to work within Windows virtual machines, but several customers have reported success after some troubleshooting.

The most common issues reported are device disconnect issues and Spike not being able to detect the BB60C. Both issues suggest USB configuration errors.

- Customers have reported success using the latest versions of VMware on both Windows and Apple computers. The PC must support USB 3.0, preferably with a 4<sup>th</sup> generation or later Intel i5/i7 CPU.
- Ensure USB 3.0 SuperSpeed is enabled for the virtual machine. Customers report it is often disabled by default.
- The Spike installer may not correctly install the BB60C drivers, and might need to be manually installed. See <u>Driver Installation</u> for instructions for manually installing the BB60C drivers.

# 9 Calibration and Adjustment

Contact Signal Hound for more information regarding calibration software and required equipment.

# 11 Appendix

## 11.1 USING MULTIPLE USB 3.0 DEVICES ON LINUX

There are system limitations when attempting to use multiple Signal Hound USB 3.0 devices\* simultaneously on Linux operating systems. The default amount of memory allocated for USB transfers on Linux is 16MB. A single Signal Hound USB 3.0 device will stay within this allocation size, but two devices will exceed this limitation and can cause connection issues or will cause the software to crash.

The USB memory allocation size can be changed by writing to the file

/sys/module/usbcore/parameters/usbfs\_memory\_mb

A good value would be N \* 16 where N is the number of devices you plan on interfacing simultaneously. One way to write to this file is with the command,

sudo sh -c 'echo 32 > /sys/module/usbcore/parameters/usbfs\_memory\_mb'

where 32 can be replaced with any value you wish. You may need to restart the system for this change to take effect.

\*Includes both Signal Hound USB 3.0 spectrum analyzers and signal generators.

## **11.2 COMMAND LINE OPTIONS**

The following command line options are available when launching Spike.

*--hidden*, Hides the user interface, including on the taskbar. To be used in conjunction with SCPI to allow for 'headless' operation. The application can be closed via SCPI commands or manually in the task manager.

The following dialogs will not be shown in hidden mode:

- No device connected
- Multiple devices connected
- Connecting device..
• SCPI remote operation notification

--preset=n, Load quick preset number *n* after launching. *n* must be an integer between [1,9]. For this command to work, one device must be connected to Spike so that Spike will auto connect, and the preset specified must have been created with the connected device type.

--preset-user="filename.ini", Load a user preset on startup. The full path to the file name must be specified. If the filename or path contains spaces, you must surround it with quotes, otherwise quotes are not strictly necessary. For this command to work, only one device can be connected to the PC, and the preset must have been created with the connected device type.

--scpi-port=n, Set the SCPI port after launching Spike. *n* should be an integer not exceeding 65535. This has the same effect as modifying the SCPI port through the preferences menu. This command line assists customers who want to interface multiple instances of Spike with different SCPI ports.

# 11.3 MATLAB<sup>®</sup> RUNTIME INSTALLATION INSTRUCTIONS

To use the LTE measurements in Spike, the MATLAB<sup>®</sup> runtime and, for Windows, Visual Studio 2019 (VS2019) C++ redistributable libraries must be installed on the PC. The next two sections detail how to install these freely available libraries.

### 11.3.1 Installing the MATLAB Runtime

The MATLAB<sup>®</sup> runtime is freely available for download from the following website.

https://www.mathworks.com/products/compiler/matlab-runtime.html

### 11.3.1.1 Windows

Download the 64-bit Windows installer for R2021b (9.11). Extract the downloaded folder and run the setup.exe file. Install the MATLAB Runtime to the default installation folder.

During installation, the installer will add the MATLAB<sup>®</sup> runtime folder to the system path. If this fails, you will receive this warning during installation.

## "The MATLAB Runtime could not be successfully added to your system path. You must add the following folder manually: C:\Program Files\MATLAB\MATLAB Runtime\v911\runtime\win64"

This will often fail due to the system PATH environment variable exceeding its maximum length. In this event, you must add the runtime folder to the system path manually. This can be performed using the registry editor or through the environment variable editor on Windows. Editing the system path via the

registry editor will allow you to exceed the length limit of 2047 characters. Editing the path via either method will require you to restart the PC before Spike will properly detect the MATLAB runtime libraries.

#### 11.3.1.2 Linux

Download the 64-bit Linux installer for R2021b (9.11). Extract the downloaded folder and run the installation file with:

sudo -H ./install

Install the MATLAB Runtime to the default installation folder, which is /usr/local.

### 11.3.2 Windows Only: Installing the VS2019 C++ Redistributable Library

The Visual Studio 2019 C++ redistributable libraries are available at the following link. Download and install the 64-bit (non-ARM) libraries.

https://docs.microsoft.com/en-US/cpp/windows/latest-supported-vc-redist?view=msvc-170

### 11.3.3 Load Times

The Spike software initializes the MATLAB runtime when the LTE measurements are accessed. This load time can take typically anywhere from 3-15 seconds. This load time cost will be incurred once per launch of the Spike application. The presence of anti-virus software can greatly affect these load times. Consider disabling any real-time AV monitoring software to reduce these load times.

### **11.4 CONSTELLATION MAPPINGS**

**BPSK** 

Data	Phase
0	0
1	180°

QPSK

#### DQPSK

- 1	
Data	Phase Change
0	0
1	+π/2
2	- π/2
3	π

#### π/4 DQPSK

Data	Phase Change
0	+π/4
1	+3π/4
2	- π/4
3	-3π/4

#### D8PSK

Data	Phase Change	
0	0	
1	+π/4	
2	+3π/4	
3	+π/2	
4	-π/4	
5	-π/2	
6	π	
7	-3π/4	

8-PSK

### Appendix | Constellation mappings

Note: Positive I-axis is to the right, positive Q-axis is to the top.

#### 32/64/256/1024-QAM

64/256 QAM is defined similarly to 16 QAM. Symbols are increasing from right to left, top to bottom, starting with 0 in the upper right-hand corner of the constellation diagram and ending with 63/255/1023 in the lower left-hand corner.

#### OQPSK

Offset QPSK is the same as QPSK, except the Q is delayed by ½ symbol.

#### M-FSK

All FSK modulations are gray coded. For example, 4FSK uses the following mapping,

Data	Frequency Offset (normalized)
0	-1
1	-1/3
2	1
3	1/3

### 11.5 MANUAL GAIN/ATTEN SETTINGS (BB60)

All settings must be set to non-automatic values to override the automatic settings.

The preamplifier setting does not affect the BB60 measurement but should be switched from auto for manual selections to be used.

For the gain setting,

- Gain 0: Preamplifier off, add 5dB to attenuator
- Gain 1: Preamplifier off, do not add attenuation
- Gain 2: Preamplifier on, add 5dB attenuation
- Gain 3: Preamplifier on, do not add attenuation

For the attenuation setting,

- Attenuation 0 20dB: adds 0 to 20dB of attenuation, plus any contribution from gain setting.
- Attenuation 30dB: adds 30dB of attenuation, and the effects of gain 0 and 2 are the same as gain 1 and 3.
