PRESS RELEASE

Signal Hound Honored by 2022 Military + Aerospace Electronics Innovators Awards

Battle Ground, WA – January 2023 – [Signal Hound](https://www.signalhound.com), a company that offers unrivaled value in the test equipment industry, announced today its [SM435B mmWave Spectrum Analyzer](#) was recognized among the best by the 2022 Military + Aerospace Electronics Innovators Awards. An esteemed and experienced panel of judges from the aerospace and defense community recognized Signal Hound as a Silver honoree.

“On behalf of the Military + Aerospace Electronics Innovators Awards, I would like to congratulate Signal Hound on their Silver-level honoree status,” said Military + Aerospace Electronics Editor in Chief John Keller. “This competitive program allows Military + Aerospace Electronics to celebrate and recognize the most innovative products impacting the aerospace and defense community this year.”

The SM435B is a high-performance spectrum analyzer and monitoring receiver. Tuning from 100 kHz to 43.5 GHz, the analyzer has 160 MHz of instantaneous bandwidth (IBW), 110 dB of dynamic range, 1THz/sec sweep speed at 30kHz RBW (using Nuttall windowing), and phase noise performance that is low enough to contribute less than 0.1% error to EVM measurements and rival even the most expensive spectrum analyzers on the market.

About Military + Aerospace Electronics

Military + Aerospace Electronics is the leading media resource serving program and project managers, engineering managers, and engineers involved in electronic and electro-optic design for military, space, and aviation applications. Military + Aerospace Electronics magazine delivers time-sensitive news, in-depth analyses, case studies, and real-world applications of new products, industry opinion, and the latest trends in the use of mil-spec, rugged and commercial off-the-shelf components, subsystems, and systems.

About Signal Hound

Signal Hound is a manufacturer of affordable, high-performance test equipment based in Battle Ground, WA. Starting out as Test Equipment Plus in 1996 and offering used test equipment and repair services, Signal Hound expanded its offerings in 2010 with the introduction of the USB-SA44 USB-powered spectrum analyzer. Signal Hound has since added several award-winning RF spectrum analyzers and signal generators, now sold globally.
