FOR PRINT AND ONLINE RELEASE: June 21, 2022

Signal Hound's SM435B 43.5 GHz Spectrum Analyzer Now Available for Purchase

BATTLE GROUND, Wash.—June 21, 2022—Signal Hound's long-anticipated SM435B 43.5 GHz, high-performance spectrum analyzer is now available to order [SM435B](#).

[Signal Hound](#), a developer of highly-optimized solutions for RF signal test and measurement, originally announced production of the SM435B in the second quarter of 2021. Its official release date has been delayed up to now but the wait is over, this powerful new mmWave spectrum analyzer is on the shelf and available for purchase.

The affordability of the SM435B opens the door to industry professionals who were previously unable to attain this power in a compact and economic package. It is available now to unlock your next adventure in the mmWave space.

It can be purchased directly from Signal Hound at www.signalhound.com or from one of our world-wide distributors.

For additional information about the SM435B, download the original press release [here](#)

About Signal Hound

Signal Hound is a manufacturer of affordable, high-performance test equipment based in Battle Ground, WA. Starting out as Test Equipment Plus in 1996 and offering used test equipment and repair services, Signal Hound expanded its offerings in 2010 with the introduction of the USB-SA44 USB-powered spectrum analyzer. Signal Hound has since added several award-winning RF spectrum analyzers and signal generators, now sold globally.
